

# Techknow's 32" OCS

**W** An Analytics Driven Digital Merchandising Platform

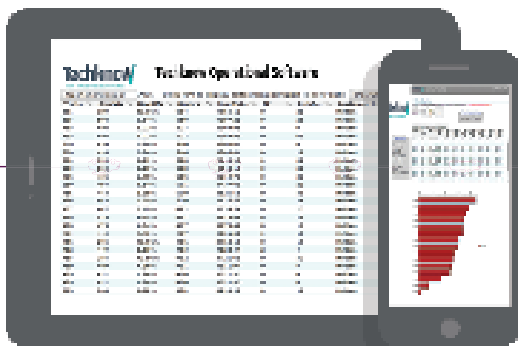

**TEMS** is a cloud based application that allows the marketing team to remotely manage all campaigns on the OCS. This includes running and analyzing effectiveness of promotions by daypart, displaying pictures of suggestive sell items thus increasing your average ticket. In addition TEMS pushes community messaging or consumer alerts to your OCS.

**TOPS** cloud based applications enable the restaurant to remotely monitor the operational status of each device thus improving help desk efficiency. Track and monitor vehicle detection box or loop issues. Be notified upon the loss of data or when wiring problems are identified.

**TEMS & TOPS** can be managed from any mobile device with internet access.

\*Subscription required

## Your Drive-Thru produces 70% of the Restaurant's revenue.

Turn it into an affordable digital merchandising platform with Techknow's New 32" Order Confirmation System / Promotion / And Pre-Sell Board.

# W Cutting Edge Technology

The 32" OCS utilizes Linux OS for open architecture and security.

Our unique cooling technology has made Techknow one of the coolest operating units in the industry.

Techknow's order confirmation boards are the brightest in the industry. We have developed interfaces with over 95% of all POS systems and many back office systems.

Techknow's pedestal was designed with an interchangeable front panel that enables you to change colors without replacing the entire pedestal.

Techknow Installation and Field Service team provides national coverage. We can be at any location within four hours.

## INPUT POWER
