

“There’s no time like the present”

Techknow's timer, combined with enterprise Webstats software, provides your team with real-time data feeds. These graphically depicted feeds enable your management team to make decisions that will enhance operational performance today. Competition Ranking software is proven to reduce drive-thru times and build a fun, competitive environment where stores can compete on up to 20 different variables.

From **October 1 - December 31, 2015**, Techknow is running a year end promotion - purchase a Techknow timer and receive the first year of Webstats for free!

In addition, the 2nd and 3rd year of Webstats are only \$288.00, representing a 40% discount, and you'll also get six months of Competition Ranking software for free. These combined software packages have been shown to dramatically reduce drive-thru times and increase check averages.
